

# *Kids in the Hills*

*May 31<sup>st</sup> - June 2  
offered for grades 4-6*

You and your students can participate in a daylong field study in the Dishman Hills Natural Area! Students will engage with scientists and environmental educators while covering topics such as: forestry, wildlife, geology, and water quality as they move through a variety of complex and diverse areas in the Hills.

Dishman Hills is always available for field studies, but this is your annual opportunity to let experts provide a special, in depth outdoor experience for your students.
